Illustrative synthetic recovery trajectory: run_reaction_coupling_shift_01579
Observed faulty-process score (moving average)
Controlled-state recovery score (moving average)
Run-specific recovery threshold
Fault onset (t=200)
Detection (t=231)
Recovery starts (t=232)
Recovery criterion met (t=246)
Initial gaps: lag history and a full moving-average window are required
Covariance-normalized score
